

Water Pipe Replacement

A recent project we have completed is the replacement of the water supply from Skipton Old Road to the Foulridge Cricket Pavilion. The old system was metal piping and was an old installation. To future proof the supply to the pavilion, we contracted a new modern pipe system which cannot be affected by corrosion. At the same time we installed new meters and a standpipe in a Parish owned field. The total net cost was £7,880 of which we received a grant from the Colne Area Committee of Pendle Borough Council of £3,000.
